

Expandable Spreader

The Expandable Spreader is conducive to spreading multiple layers of various width materials using one system. The maneuverable spreader adjusts one-way or face-to-face spreading. Ideal for smaller shops with cloth rolls less than 150 lbs (68 kg) or as emergency machine for cutting rooms with motorized spreaders. The manual edge control and lifters guide the material as the operator spreads it along the cutting table.

Standard Features

Manual Edge Control
Roll Bar

Specifications

STANDARDS	ENGLISH	METRIC
Maximum Spread Height	9 in.; 15 in. optional	22.9 cm; 38.1 cm optional
