

Presenting a full line of High-Performance LED lights for the sewing trades

Energy Efficient and Eco Friendly. Save up to 90% energy compared to traditional fluorescent or incandescent lights.

Service life is approximately 60,000 hrs.

Most lights can be mounted with convenient magnetic light holders. They can also be mounted on the head, and have the ability to illuminate the working area from both sides of the needle utilizing minimal space.

COOL-LITE® LED LAMPS

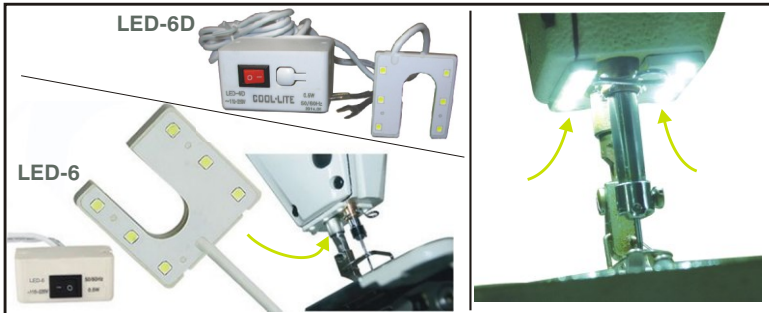

COOL-LITES remain cool at all times. If you accidentally touch the light you won't get burned as with old fashioned lights. They don't contribute heat to the work area, making for a better environment for the machine operator.

COOL-LITE® LED LAMPS

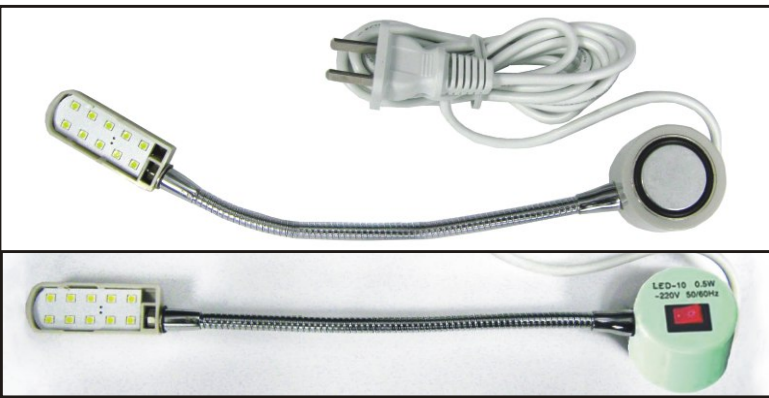

Model: LED-5
 Power: 0.5 W
 LEDs: 5
 Voltage: AC110-240V
 Frequency: 50/60 Hz
 LED5 connects to motor switch
 LED-5P with AC plug
 Application: Any Sewing Machine,
 Mounts on machine just above the needle.

LED-5 wired connection
LED-5D With Dimmer switch
LED-5P with AC Plug

Model: LED-6
 Power: 0.5W
 LEDs: 6
 Voltage: AC110-240V
 Frequency: 50/60 Hz
 Connects to: Motor Switch
 Application: Any Sewing Machine,
 Mounts on machine just above the needle.

LED-6 wired connection
LED-6D With Dimmer switch

Model: LED-10
 Power: 0.5 W
 Voltage: AC110-240V
 Frequency: 50/60 Hz
 LED10 connects to motor switch
 LED-10P with AC plug
 Mounting: Strong Magnet
 Application: Any Sewing Machine
 Feature: Has convenient on/off switch on magnet mounting

LED-10 wired connection
LED-10P with AC Plug

Model: LED-20
 Power: 1.0 W
 LEDs: 20
 Voltage: AC110 - 240V
 Frequency: 50/60 Hz
 LED20 connects to motor switch
 LED-20P with AC plug
 Mounting: Strong Magnet
 Application: Any Sewing Machine
 Feature: Has convenient on/off switch on magnet mounting

LED-20 wired connection
LED-20P with AC Plug
