Corporate Headquarters

Atlanta Attachment Company is a global supplier of sewing workstations, automated sewing equipment, folders, attachments and other labor saving devices for the apparel industry. Our equipment is built from the highest quality materials and with dedicated workmanship. The Atlanta Attachment brand is well known throughout the sewn products industry for its innovative technology.

Our line of apparel production equipment is developed for working with materials such as knit, woven and synthetic. A few of the many products sewn include placket shirts, circular collar and flat collar tee-shirts. AAC offers many sewing workstations for sweatshirts, sweatpants, and hooded sweatshirts. Equipment is also available for producing mens and ladies underwear, blouses and pajamas. More equipment is available for sewing drapery, caps and aprons. Multi-head embroidery equipment can be used for items needing personalization.

AAC stocks a wide variety of sewing machine attachments and folders but from it's inception has specialize in custom sewing machine folders. The Atlanta Parts Depot division delivers one-stop shopping for replacement sewing machine parts.

Our manufacturing facility in Lawrenceville Ga, USA is capable of handling any type of fabrication needed for our equipment.

- Engineering & Design
- Mechanical Assembly
- Electronic Assembly
- Electrical Assembly
- Sub-assembly
- CNC Milling up to 120"
- CNC Lathe
- Manual Milling
- Manual Lathe
- Surface Grinding
- Metal Fabrication
- Metal Finishing
- Tube Bending
- Cutting: Laser, Plasma, Water Jet
- Heat Treating
- Welding
- Painting
- Warehousing
- Distribution & Installation

Introducing VETRON

Awarded **TEXPROCESS Innovation Award 2011**, this innovative machine design leaves the conventional way to build a sewing machine behind. Instead of a housing as a main unit that carries all mechanical parts, this so-called "frame" now simply plays a supporting role and can be easily exchanged between alternative models. All functional components are merged in "technology modules", which are fully interchangeable. The factory pre-settings guarantee an exchange of modules without further adjustments. With this innovation you are able to adapt the machine to any future configuration... in a few minutes it is possible to convert a flatbed into a long arm machine.

Through the consistent use of state of the art electronic control it became possible to make all machine settings programmable into memory and thus recallable. This allows the process parameters to be free from operators influence and identical every time the program is recalled. The innovative dynamic machine parameter, based on the actual speed and the permanent measurement of the material thickness, opens new possibilities of production quality, process security and the reduction of cycle times.

FEATURES:

- All control elements including the bobbin winder, electronic hand wheel and reverse button are placed at the head module in the user's direct field of view.
- Tilt-assistant for easy cleaning and maintenance
- Optimized hook lubrication with fresh oil
- Noise-reduced machine features
- No use of compressed air
- All settings are programmable and storable
- User identification with USB dongle
- Permanent measurement of material thickness thereby dynamic adjustment of needle thread tension, top feed stroke, sewing speed and sewing foot pressure
- Automatic top feed stroke adjustment at cross seams
- Stitch-n-Stitch bar tacking

VETRON | 5000/5010/5020/5030

Flatbed Sewing Machines

- All control elements including bobbin winder, electronic hand wheel and reverse button are placed at the head module in the user's direct field of view
- Integrated, electric bobbin winder (continuous winding process even when machine stops)
- Integrated and dimmable sewing light
- Extremely solid construction of housing
- Tilt-assistant for easy cleaning and maintenance
- Optimized hook lubrication with fresh oil
- Integrated motor
- Noise-reduced machine features
- No use of compressed air
- Stored production settings allow for fast and precise set-up of the machine
- User identification by USB-dongle
- Permanent measurement of material thickness thereby dynamic adjustment of needle thread tension, top feed stroke, sewing speed and sewing feet pressure
- Automatic top feed stroke adjustment at cross seams
- Stitch-in-stitch bar tacking

Ultrasonic Welding Machines

- High-precision titanium or hardened steel sonotrode – Made in Germany
- Additional welding modes like baste welding, spot welding or “cut & seal” selectable
- Anvil wheel from 25 to 45 mm diameter
- Anvil wheel with adaptable puller function
- Welding of tight radiuses due to an anvil diameter of 25 mm
- Modular design (joint design for welding and sewing machines, for increased flexibility)
- No use of compressed air
- Welding with continuous or dynamic speed
- Digital welding generator with 500 or 1000 Watt (optional)
- Stepping motors for: Anvil wheel, sonotrode (separately controlled), welding gap and welding pressure
- All machine parameters are programmable and storable
- Simplified & intuitive program concept
- Setup assistant
- User identification with USB dongle possible
- Free selectable access permission
- Snap-in control panel
- Network port for central administration of the machines (optional)

Atlanta Attachment | E0900 Series

Automated Embroidery System

- Product may be personalized for each customer
- Raises price point, increasing profits as no outsourcing required
- Small quantities produced on demand
- Customer loyalty enhanced
- Multi-head design, high production, low cost
- Scan any logo and digitize in house
- AAC offers complete training and logo digitizing service

Technical Specifications:

- 9 needles, 9 colors
- Built in noise reduction technology
- Embroidery Field: 400mm x 450mm
- All steel bridge style construction
- LCD color monitor
- Solid steel rotary hook system
- Complete hoop assortment included
- Built-in disk drive and USB port
- Direct connect to computer upon request
- Built-in rotary type thread break sensors
- Automatic thread trimmers
- Automatic color changes
- Memory retention after shut down
- Removable support table top for flat goods

Postbed, Walking Foot, Lockstitch with Large Hook, Automatic Underbed Thread Trimmer, Automatic Footlift, Automatic Backtack, and Automatic Lubrication

- 2 needle modified for foam fill in place head rests, the needles are moved in line to create 2 tight stitch lines in close proximity to each other in order to eliminate the necessity of taping seams after sewing.
- Walking Foot – Bottom rectangular feed movement, Top feed with alternating presser feet, and needle feed.
- Dual thread tension
- Dial adjustment of walking foot vertical movement
- Bottom feed micro-adjustment
- Dial adjustment of stitch length
- Built in bobbin winder
- DL Device for instantaneous adjustment of walking foot vertical movement to enable crossing of heavy seams
- Hook safety clutch

Optional:

- Edge guides
- Material guides
- Folders
- Binder attachments

Semi-Automatic workstation for sewing IsoFix patches into seat backs, 2 moveable programmable pattern tacker sewing units, patented Serial Bus controller

- Two programmable pattern-tacker sewing units
- Sewing units arranged as mirror images
- Both heads move independently according to profile of seat back.
- Operator swipe switches for safe operation
- Dual head allows for simultaneous sewing of patches
- Tooling creates nest for patch, then clamps in place

Atlanta Attachment | 1380PY6

Specially Designed Work Aid, Programmable Sequence, Direct LCD Touch Screen Programmable, Stand Alone Patented Serial Bus Controller

- Stand alone, attachable to any sewing unit with electronic motor
- Expandable number of work bins (6 standard)
- Optical bin sequence
- No start switch if part not pulled from correct bin protected by light barrier
- Matches j-clip/duon to proper seam segment

Benefits:

- Ensured quality of end product
- Reduced costs due to missing j-clips
- Maintains proper sequence of parts

5504-J-34 | Atlanta Attachment

Specialty Modified, 1-Needle 3-Thread Overedge (504 stitch), Variable Top-feed, Bottom Differential Feed

- Modified top feed mechanism to increase walking movement of top feed
- Upper and Lower needle bar bushings
- Automatic Lubrication
- Cartridge type oil filter and cooling fan
- Push button stitch length adjustment
- Variable top feed adjusted by lever with micro adjustment
- Bottom differential feed adjusted by lever with micro adjustment
- Thread & needle lubrication system
- High lift stepping foot (foot lifts during feed stroke)

Optional:

- Pneumatic foot lifter
- Vacuum chain cutter
- Gathering attachments

Juki | AMS22E-2516/-3020

Computer-Controlled Cycle Machines with Input Function, Direct-Drive Servo-Motor, High Speed, Reduced Cycle Time, Operation Panel Direct Programming

- AC Servo-motor Direct-drive
- Built-in bed feed mechanism
- Underarm free space maximized
- Needle bar reverse mechanism for increased and maximum clearance during clamp load and unload process
- IP410 touch screen operator panel (color)
- 200 program capacity (20,000 stitches per pattern)
- Compact Flash storage media
- Oil-less sewing head (hook lubricated)
- Two stage pneumatic clamp

Sewing fields:

- AMS-22E-2516 25cm x 16cm
- AMS-22E-3020 30cm x 20cm

Optional:

- Programming software PM1
- Needle thread clamp device
- Needle cooler
- Milling unit
- Thread tension controller
- Pneumatic inverted clamping device
- One touch utility clamp for quick change of patterns

Computer-Controlled Cycle Machines with Input Function, Stepping-Motor Drive, High Speed, Reduced Cycle Time, Touch Panel Direct Programming

- AC Servo motor direct drive
- Rapid acceleration and deceleration
- Stepping motor drive (X-Y axis)
- Stepping motor controlled thread trimmer
- Active tension, needle thread control
- Programmable intermediate presser foot height
- IP-400 operation panel with programmable functions, and multiple languages
- Memory storage capacity of 200 patterns and a total of 20,000 stitches per pattern can be increased with external media (Compact Flash card) capable of storing 999 patterns and 50,000 stitches per pattern
- Color LCD display of data and functions
- Dry sewing head, Hook lubricated automatically
- Pneumatic work clamp, 2-Stage clamp standard for EHL
- Network capable via (RS-232C: Reverse type) cable connection

Optional:

- Programming software PM-1
- Pneumatic inverted clamp device
- Milling unit
- Needle cooler
- One touch utility clamp for quick change of patterns

KMF | 3145/1 & 3145/4

Semi-Automatic Workstation for Attaching Tubular Tape (wire pocket) to Car Seats

- Programmable start and stop of tape
- 1 Needle lockstitch sewing head (301stitch)
- Cycle counter for bobbin change
- Material transported by upper and lower belts, synchronized with sewing head
- Backtacking or stitch condensing at beginning and end of seam
- Material feed by stepping motors
- Sewing head driven by electronic servo motor
- Tape fed from roll underneath machine
- Seam length programmable and variable
- Microprocessor controlled

Optional:

- Laser light positioning guide
- Thread monitor for upper thread
- Chainstitch sewing head

Cutting and Punching Unit for Retainer Strips, Comprising of Roll Feed Mechanism, Punching Unit, Cutting Unit, Microprocessor Controlled and Fully Programmable

- JIT production of retainer strips
- No pre-cut and pre-punched retainers required in inventory
- Sequences of different lengths, holes, and notch locations are freely programmable
- Number of finished parts can be programmed
- Multiple widths can be cut without adjustment (70mm max)
- Finished product disposed into box for easy handling
- Stepper motor driven feeding system

Optional:

- Sewing station for welt type retainer strips (3145/4) Flatbed Chainstitch sewing head with close coupled puller
- Unrolling device to remove welt cord from roll
- Buffer station between unroll and sewing station
- Buffer station between sewing and cut-and-punch station
- Cutter and one punch (standard) additional punches (max 4) with different shapes (v-notch, diamond, half round, oblong)
- Chute disposal into box

Triple-Feed Sewing Machine with Vertical Hook

- High traction due to unison feed
- Even feed motion without any ply-shift of individual layers
- Large vertical rotary hook with 60% more capacity than other standard-sized hooks
- Rugged and durable
- The high top feed lift (7.0 mm) allows trouble-free sewing of thick materials and an easy sewing over cross seams
- Easy loading and unloading (even bulky material) due to a high fabric clearance of 14.0 mm

Triple-feed special high-speed sewing machine with horizontal hook

- Very good seam quality and sewing reliability on assembly and top-stitch work on medium to heavy materials
- Excellent results in top-stitching works
- Ergonomically designed and convenient placed control elements – clear and precise functions
- Bobbin winder for a secure and fast start of the bobbin winding process
- Easy access of all adjustments: Top arm cover and head cover can be removed after unscrewing a few screws
- Dial adjustment of stitch length
- **2235 Basic:** A version without automatic functions
- **2235 Plus:** A version with additional functions (e.g. overload safety clutch, programmable multi-switch, 2 top feed strokes and 2 stitch lengths pre-selectable, etc.)

Special high-speed seamer with needle feed, wheel feed and roller presser

- Exact stitch lengths, reproducible at any time
- No or highly reduced marking thanks to the material-protecting transport mode (particular with the finest materials or laminates)
- Exceptionally precise material transport via an independent drive of roller presser and wheel feed
- Panel with multi-function buttons and programmable multi-switch for backtacking is integrated in machine head
- Integrated LED light, dimmable
- No material perforation when backtacking
- Switch over to differential feed without sewing stop
- Universal application for thread sizes 80/3 to 10/3synth
- Second thread tension shiftable

Triple-Feed Special High-Speed Sewing Machine with Vertical Hook

- The machine achieves a very high stitch quality both for top-stitching work in the visible areas and for securing and assembly seams
- The ergonomically designed dials guarantee quick and accurate adjustments of the first and second top feed stroke (with automatic speed adaption)
- Programmable multi switch in easy reach of the operator
- Large clearance under the machine
- Bobbin winder for a secure and fast start of the winding process ("winding assistant")
- Easy access of all adjustments: Top arm cover and head cover can be removed after unscrewing a few screws.
- **2545 BASIC:** A version without automatic functions
- **2545 CLASSIC:** Version with one adjustable top feed stroke and one stitch length and automatic speed adaption.

Optional:

- Motor driven edge cutter with a trimming margin of 1.5mm

Docu seam system (with needle feed + differentiable wheel feed and roller presser)

- Quality assurance system for the production of safety-relevant seams
- In the field car interior the machine is very applicative for seams which have small radii at the formed parts
- Automatical thread-tension device and real-time monitoring of thread force (stitch by stitch)
- Skip stitch recognition inside and outside of documented seams
- Electronic thread tension adjustment (no manual adjustment necessary)
- Sewing head recognition
- Operation of all functions with touch-screen
- Free label design
- Programmable stitch length (in each seam sector)
- Scanner for thread and label control

Optional:

- Seam width control with sensor-controlled edge guide
- Thread force calibration
- Motor-driven edge cutter with smallest edge distance of 1.5 mm

Tooling for the SunStar® SPS/C-8050H

- Custom tooling to sew large, irregular pieces
- Consistent, uniform stitching improves appearance of finished part
- Machine sews as operator loads next piece; in many cases operators can run two machines
- Cassette tooling allows machine to sew multiple styles on one machine
- Clamp recognition, available on some models, allows the machine to sew the correct pattern for that particular cassette

Optional:

- Edge guides
- Material guides
- Folders
- Binder attachments

Custom Designed Equipment

Working alongside our affiliate company, Atlanta Precision Machining and Fabrication, we can make any custom die for all your tooling needs.

EQUIPMENT LIST:

17 CNC Milling Centers
7 CNC Turning Centers
10 Trak K3 Programmable Mills
5 Manual Lathes

4 Surface Grinders
4 Break Presses
3 Lasers
1 Water Jet

7 Welding Booths
1 Sand Blast Booth
1 Black Oxide Tank
1 Wet Paint Line.

Ergo-Components

Tables

- All shapes and sizes available from 20"x48" rectangular, to 48"x60" L-shape
- Custom sizes available by special order
- Custom engineered air tables

Stands

- Sit-down operation T-Legs
- Stand-up operation T-Legs (reinforced)
- Ergo stands with manual or electric height adjustment
- All stands available with casters

Pedals

- Sit-down pedals for Clutch or Electronic motors
- Stand-up Pedals
- Various configurations from 1 to 4 pedals to control all or individual functions
- Custom pedals manufactured to customer specification.

Motors

- EFKA, Juki, Panasonic, Mitsubishi and Quick
- 110/220 Volt Clutch
- 110/220 Electronic Servo (AC and DCs)
- Choice of control panels and synchronizers

Serial Bus Control System

Automated Sewing Equipment with the Patented Serial Bus Control System

Our new Serial Bus Control System is a quantum change for our automated sewing equipment **and** the sewn products industry. Our Serial Bus System, based on only four wires, is self-diagnostic and offers helpful solutions to solve the problem.

An operator using a touch screen control panel manages this rugged, uncomplicated system. Designed to international standards, this multi-lingual, easy to operate interface will allow numerical parameters to be saved, allow technician access with password protection and offers a built-in production performance monitor which can be networked to a central computer.

Unconditional Warranty 3 Years Unconditional... Period!

A warranty is a fulfillment promise to be honored with pride. At Atlanta Attachment Company we are proud to honor our new 3 Year Warranty which is unsurpassed in the industry. This warranty covers all electrical components of the state-of-the-art Serial Bus Control System used on our Automated Sewing Workstations.
